

## The Procedures Course | Europe 2023

**A fully immersive cadaveric course focusing on life, limb and sight saving resuscitative procedures.**

The Procedures Course is a two-day course that will teach you how to confidently perform a wide range of basic and complex resuscitative procedures. First established in 2016, places on this course are now highly sought after within the Australian critical care community. This year we are excited to offer two course locations in Europe: Leuven, Belgium and Cambridge, UK.

Procedural teaching will be conducted by a group of renowned experts in trauma management from the Alfred Emergency & Trauma Centre, Australasia's largest trauma service, as well as leading specialists from the UK, Ireland and Belgium.

Sessions will have a heavy emphasis on acquiring hands-on skills for the management of the multiply injured complex trauma patient.

### Who should attend:

Retrievalists, Emergency/Intensive Care/Anaesthetic Consultants, Rural GPs/CMOs involved in retrievals/trauma resuscitation, Senior Critical Care Registrars (Emergency/Intensive Care/Anaesthetic/Retrieval)

### Procedures will include:

- Surgical airway (cricothyroidotomy)
- Orbital decompression (lateral canthotomy and cantholysis)
- Pleural decompression (finger thoracostomy and pleural drainage)
- Vascular access (MAC line / RIC line / Intraosseous access)
- Temporary trans-venous cardiac pacing
- Pericardial decompression (including resuscitative thoracotomy)
- Retrieval limb amputation
- Escharotomy

### WHEN AND WHERE:

#### Cambridge

Human Anatomy Centre  
Department of Physiology,  
Development and Neuroscience  
University of Cambridge

#### Leuven

KU Leuven  
Skills Center Anatomy  
(Vesalius Institute)
